Curriculum Intent for Art:

At Sheerhatch Primary School our intent is always to inspire creativity and foster a lifelong appreciation for the arts among our students. We aim to cultivate a thriving community where individuals can express themselves freely and engage with various forms of artistic expression. Through a well-structured programme, we designed to enhance technical skills and develop critical thinking, allowing students to explore and interpret the world around them through an artistic lens.

Implementation:

Teachers will use a variety of teaching and learning strategies to implement the art curriculum. There will be an artist/artists to focus on and to view high quality examples of the mode of art. Pupils will be given time to develop their skills and learn new artistic techniques. The school will provide high quality equipment and resources to enable success for all pupils. There will be dedicated time given to evaluate the end product of each learning block.
