

The Alps

Key info	
continents	Europe, Asia, Africa, North America, South America Australia, Antarctica
The Alps	a mountain range which stretches across France, Switzerland, Italy, Germany, Liechtenstein, Austria and Slovenia
fossils	the remains or traces of plants and animals that lived a long time ago
sedimentary rocks	rocks formed from sediment grains deposited by water, wind or ice. They are always formed in layers and often contain fossils
igneous rocks	rocks that have formed by the cooling and hardening of molten lava or magma. 'Ignis' means 'fire'
metamorphic rocks	rocks which have been changed by extreme heats or pressure

Mary Anning

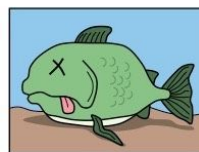

Mary Anning was born in the seaside town of **Lyme Regis, Dorset, UK, in 1799**

It's said Mary had a lucky escape when she was a baby. The lady holding her was struck by **lightning**. Miraculously, little Mary survived.

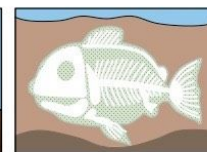

In **1811**, when Mary was **12**, they uncovered a strange **5.2-metre-long skeleton!**

Mary is recognised as a **pioneer** in the field of **palaeontology** (the study of fossils) and is celebrated as the greatest fossil hunter of all time!

Fossilisation process

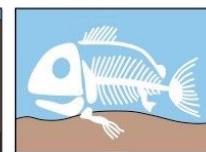

Death and decay

Rapid Burial

Permineralisation

Erosion / Exposure
