

SCIENCE: Seasons

All year

Year 1

Spring

In spring, the weather starts to get warmer. The leaves begin to grow on the trees and some trees may blossom (have flowers). Plants begin to grow and you may see baby animals like lambs around. The daytimes start to get longer

Summer

In summer, the weather gets hotter. The daytime is longer and the nights are short. Summer has the longest days. Trees are full of leaves and there are lots of flowers, bees, butterflies and other insects.

Month	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	June	July	Aug
Hours of Daylight	13	11	9	8	8	10	12	14	15	16	16	14

Autumn

In autumn, the weather begins to get colder. The leaves start to fall from the trees. The amount of daylight becomes less. This means the daytimes are shorter and the night times are longer.

Winter

In the winter, the weather is much colder. Sometimes it is cold enough to freeze, leaving frost and ice on the ground. It sometimes snows. Many trees have bare branches as all their leaves have fallen off. The daytimes are the shortest in the year and the night times are the longest.

Seasons	Weather	Daylight
There are four seasons each year, autumn, winter, spring and summer	The weather includes the temperature outside, the wind direction and strength, as well as rain, cloud, snow and sun.	Daylight is when it is light outside. The amount of daylight changes with each season
